

SkilliZee Ideathon 2026 - PPT Guidelines Content

Slide 1: SkilliZee Ideathon 2026

Think. Create. Innovate. Impact.

Mentor Script:

Every innovation you see around you started with one simple idea.

This year, SkilliZee Ideathon is not just a classroom competition...

It is your chance to solve real problems, build real solutions, pitch like entrepreneurs, and compete all the way to an Interschool Grand Finale.

Over the next few weeks, you'll experience what real innovators and startup founders do every day.

Slide 2: Your Journey Begins Here

Levels:

- Level 1: In-Class Competition
- Level 2: Inter-Class Competition
- Level 3: Interschool Grand Finale @ CCWS

Mentor Script:

Every successful startup begins with one small step.

Today you begin in your classroom.

Tomorrow you could be pitching in front of founders, industry experts, and students from other schools.

Slide 3: The Challenge

ONE REAL-WORLD PROBLEM

- Understand it
- Research it
- Find the root cause
- Build the best possible solution

Remember: The problem is common... But the solution should be uniquely yours.

Mentor Script:

Hundreds of teams will solve the same problem.

The winners won't be those who copy ideas.

The winners will be those who think differently.

Slide 4: Build Like Innovators

Work in Teams: 4-5 Students

Steps:

- Step 1: Understand the Problem
- Step 2: Brainstorm Ideas
- Step 3: Choose the Best Solution
- Step 4: Create Your Prototype (Prototype OR Working Model)
- Step 5: Prepare Your Pitch (2–3 Minutes. Explain: Problem, Solution, Impact)

Mentor Script:

Don't wait for the perfect idea.

Build. Test. Improve.

Slide 5: Ideathon 2026 — Student Guidelines

Build an AI Prototype That Solves a Real Problem

You can build anything that works — not just a website or app: Physical models, Robots, Wearables, IoT devices, Dashboards, AI Assistants. A working physical model is compulsory to qualify for the second round. Pick ONE genre below and build a working prototype for it.

Genres:

1. Mental Health

- Problem: Millions struggle silently with stress due to a lack of private, low-pressure ways to check in on their mental health.
- Challenge: Design a private, AI-powered device or wearable that serves as a judgment-free first step for mental well-being.
- Tip: Keep it private. If it feels like it's 'watching', it will fail.

2. Healthcare

- Problem: Small clinics and schools lack basic diagnostic tools. Serious conditions go undetected.
- Challenge: Build a low-cost, portable AI health-screening device (e.g., fingertip scan or vision kit).
- Business: Sell as a subscription to schools, rural clinics, corporate CSR.

3. Public Sector

- Problem: Cities struggle with undetected road damage until accidents happen due to lack of early detection.
- Challenge: Build a low-cost AI device for vehicles to automatically map road damage.
- Business: Sell live map dashboard to Municipal corporations, PWD, and Cab companies.

4. Family Business Innovation

- Problem: Small family businesses lose money daily due to untracked issues like stockouts or spoiled goods.
- Challenge: Visit a family business, identify one real costly problem, and design an AI tool to fix it.
- Tip: You MUST talk to the actual business owner or staff first.

5. Problem-Solving Startup (Pitch)

- Problem: Millions face everyday problems where existing solutions are too expensive or inaccessible.
- Challenge: Identify a widespread problem and design a working, affordable startup product to solve it.
- Tip: You need a working model AND a simple business plan (who pays, why choose you).

Live Demo Rules:

- Show your model working live — don't just show slides
- Let the judge try it themselves (press it, walk past it, show an object)
- Show the website or app made
- Explain the real problem it solves, in one sentence

Checklist:

- I picked one genre
- My prototype is a working model, not just a slide
- It uses AI to sense → think → act
- I can explain the real problem it solves in one line
- (Family Business only) I talked to the actual business owner/staff

Slide 6: Your Secret Superpowers

Smart Innovators Use Smart Tools (AI Tools)

- **PPT Tools:** Gamma.app, Chronicle, Slidesgo
- **Website Tools:** Lovable.dev, Emergent
- **App Tools:** Claude AI, Codex AI

Mentor Script:

AI doesn't replace your creativity. It multiplies it.

Slide 7: Level 1 (Class Competition)

- **Week 1 (July 29):** Ideation (Team Formation, Understand Problem, Brainstorm)
- **Week 2 (July 31):** Mentor Support (Watch Doubt Solving Video, Q&A, Finalize Solution, Start Prototype)
- **Week 3 (Aug 29):** Presentation Day (Present: Problem, Solution, Prototype, Pitch)

Winners Selected: 1 Team per Class

Slide 8: How to Use & Submit to Portal

(Video Walkthrough placeholder)

Slide 9: Welcome to Level 2

Inter-Class Competition

The Flow:

- Winning Teams
- One Team from each Grade

Presentation Must Include:

- Problem Statement
- Unique Solution
- Working Prototype (Mandatory)
- Final Pitch

Mentor Script:

Level 2 isn't about reaching the finals.

It's about proving your solution actually works.

Slide 10: The Grand Finale

Level 3: Interschool Grand Finale

Hosted at Cambridge Court World School. Students from different schools compete together.

Experience:

- Innovation Masterclass
- Prototype Refinement
- Networking
- Professional Jury Pitch
- Prize Ceremony

Rewards:

- Cash Prize
- Rolling Trophy
- Certificates
- Electronic Device

Mentor Script:

Imagine presenting your idea in front of startup founders.
That's where your journey could lead.

Slide 11: Important Dates

- **July 29:** Ideathon Round 1 – Class Level Begins
- **July 31:** Team & Genre Submission along with Masterclass
- **Aug 29:** LEVEL-1 : Finalize Idea + Prototype + Class Presentations
- **TBA:** GRAND FINALE – But only if u win Level 1 & 2

(These dates are final for the 2026 Ideathon.)

Slide 12: Are You Ready?

Call to Action:

- Think Bigger.
- Create Smarter.
- Build Better.
- Pitch Fearlessly.

Remember: Innovation isn't about having the best resources. It's about solving the right problem.

See You at the Grand Finale!
